PROJECTS

Academy App

React Native Development

Developed a mobile application for educational academies where students can browse and purchase classes, view class schedules, and track attendance. The app includes a secure login/signup system, interactive class listings, and user-friendly UI for booking classes.

Hotel Management

React Js Development

Designed and developed a fully functional hotel/restaurant management system to streamline daily operations. The system allows staff to manage table bookings, take customer orders, and handle billing.

Netflix Clone

Web Development

The project aimed to provide an immersive video streaming experience with user authentication, content browsing, and media playback capabilities., HTML, CSS, JavaScript.

Automated System For Assisting Blind People

Team Member

The development of a 'Automated System for Assisting Blind People' is a noble endeavor aimed at making a positive impact in the lives of visually impaired individuals., Python, OpenCV, TensorFlow, Raspberry Pi Face Detection.
